73. Set Matrix Zeroes

Medium ▷ Topics @ Companies ♡ Hint

Given an $\boxed{m \times n}$ integer matrix, \boxed{matrix} , if an element is $\boxed{0}$, set its entire row and column to $\boxed{0}$'s.

You must do it in place.

Example 1:

| 1 | 1 | 1 | 1 | 0 | 1 |
|---|---|---|---|---|---|
| 1 | 0 | 1 | 0 | 0 | 0 |
| 1 | 1 | 1 | 1 | 0 | 1 |

Input: matrix = [[1,1,1],[1,0,1],[1,1,1]]
Output: [[1,0,1],[0,0,0],[1,0,1]]

Example 2:

| 0 | 1 | 2 | 0 | 0 | 0 | 0 | 0 |
|---|---|---|---|---|---|---|---|
| 3 | 4 | 5 | 2 | 0 | 4 | 5 | 0 |
| 1 | 3 | 1 | 5 | 0 | 3 | 1 | 0 |

Input: matrix = [[0,1,2,0],[3,4,5,2],[1,3,1,5]]
Output: [[0,0,0,0],[0,4,5,0],[0,3,1,0]]

Constraints:

- m == matrix.length
- n == matrix[0].length
- 1 <= m, n <= 200
- $-2^{31} \leftarrow matrix[1][1] \leftarrow 2^{31} 1$

Follow up:

- A straightforward solution using $\overline{\mathbb{O}(nn)}$ space is probably a bad idea.
- Could you devise a constant space solution?
