Dear Hiring Manager,

I am thrilled to apply for the position of a new member of the Engineering team at Snorkel AI, as advertised. With a recent degree in Computer Science, hands-on experience in software engineering internships, and a strong passion for democratizing AI, I am eager to contribute to Snorkel AI's mission of redefining how AI is built.

Having recently completed an internship at Tech for Good Inc., a company dedicated to leveraging technology for positive social impact, I honed my skills in software engineering while working on projects aimed at solving real-world problems. During this internship, I collaborated with multidisciplinary teams to develop innovative solutions, gaining valuable experience in machine learning, data systems, and web applications—all of which are directly relevant to the challenges faced in the AI industry.

The opportunity to join Snorkel AI excites me immensely, as it aligns perfectly with my career aspirations of combining cutting-edge technology with social impact. From Snorkel's inception as a research project in the Stanford AI Lab to its current position at the forefront of generative AI breakthroughs. The commitment to empowering individuals to build custom AI with their data resonates deeply with my professional goals.

My internship experiences, combined with my proficiency in Python and exposure to languages such as C++, and Typescript, have equipped me with the practical skills and knowledge needed to thrive in a fast-paced startup environment like Snorkel AI. I am eager to leverage my skills and contribute to Snorkel AI's success while furthering my own growth as an engineer, communicator, and team player.

Thank you for considering my application. I am eager to discuss how my skills, experiences, and passion for democratizing AI align with the needs of Snorkel AI. I am confident that I can make meaningful contributions to the Engineering team and help drive Snorkel AI's mission forward.

Warm regards,

Bhavya Mistry
